

Rabbit Brain Block Map – up to 4 brains coronally sectioned

Name _____

Quote # _____

Block ID _____

(for multiple block quotes)

Instructions:

- 1) Verify that you are using the block map appropriate for the animal type, # of animals and plane of sectioning (coronal, horizontal or sagittal).
- 2) Type your name, the quote#, and for projects with multiple blocks, a unique Block ID. For multiple blocks, complete a separate form for EACH block.
- 3) In the numbered ovals below, type the identification (ID) for each brain to ensure proper placement in the array. ***The ID typed must match exactly the labels on the specimen containers shipped to NSA.*** Click directly in each block to type your personal ID for that tissue.
Note: For fewer than 4 brains, you may choose which of the spaces to be left blank, as long as the total ID's match the total # of brains.
- 4) Save the form: File, Save As, choose a unique file name that includes the quote#.
- 5) Email the form to Histology@NSALabs.com.
- 6) Print and Submit the form: File, Print, then submit along with the tissues.

The diagram consists of a large rectangle with a vertical line on the left side, creating a narrow column. To the right of this line, there are four ovals arranged in a 2x2 grid. The top-left oval is labeled '1', the top-right is '2', the bottom-left is '3', and the bottom-right is '4'. A small solid black circle is positioned in the bottom right corner of the main rectangular area.
